

Man cages for Faroe Islands and Iceland

Port-Trade has delivered Timars man cages to Faroe Ship in Torshavn and Eimskip in Reykjavik. They are designed for attachment under 20' container spreaders..

The Timars man cage is used for incidental lashing work on board container vessels and any other work that must be safely performed high up in the air. The 20' cage can accommodate up to 8 people.

The cage, which has 2.200 kgs own weight, can be safely attached to any standard container spreader, whether in a reach stacker, mobile crane or ship to shore crane.

The man cage can also be delivered to fit 40' spreaders and can be optionally equipped with tool storage boxes and detachable aluminum windshields.
