After closely evaluating the available alternatives over a period of several months and following a strict procurement procedure, the parties negotiated an agreement that is mutually satisfactory and forms the basis for a solid long-term business relationship.

The new 125 ton GHMK 6507 crane will operate in Sundsvall's Tunadal Terminal. It is the first mobile harbour crane in the port and strong confirmation of SCA's ambition to grow and develop. SCA also recently announced investments in excess of EUR 0.8 billion in a new factory near Sundsvall.

### **About SCA**
